DevOps Practitioner - Terminal Only

**AWS**

DevOps in AWS V2

IMP: Dear learner,

Please note: This lab is configured based on the curriculum covered during the live virtual classes.

All details pertaining to the exercises in this lab are provided in the e-books available in your LMS account.

#### Resource Limitations:

- Region: Use only US East (N Virginia), us-east-1, us-east-2. Other Regions may be selectable, but most actions will fail.
- AMI type: **Free tier eligible** only
- EC2 Instance Types: **Only t2.micro, t3.micro are allowed.**
- You can only launch on-demand instances. Reserved / Spot instances are NOT allowed.
- Block Storage (EBS / VS): Max size allowed is 30 GB. If the size exceeds, the launch will fail.
- Allowed EBS Types: GP2, Standard.
- Security Groups: Create new Security Groups for each session. Old ones will get deleted.
- RDS database class: db.t2.micro will be allowed.

Session Time:

Your Labs are ready.
