

GIT : If there are lets suppose two developers working ...and lets say one developer has updated some file in github repo ....now you are other developer...you came to office started working .... And then u realized that someone has already updated the repo ...and now when u are pushing the code it is giving you the error . How to resolve it?

master akshatrepo-new Go to file

akshu20791 Create newfile.txt a29569a

Name	Last commit message
akshat.txt	first commit
file1	second commit
index.html	first commit
newfile.txt	Create newfile.txt

A newfile.txt is created ...but I am not aware of it ...in my localrepo the file named newfile.txt is not available

```
File Edit View Search Terminal Help
akshu20791gmail@ip-172-31-83-7:~/Desktop/project$ ls
akshat.txt file1 index.html letslearn.txt
akshu20791gmail@ip-172-31-83-7:~/Desktop/project$

touch file1
git add .
git commit -m"newcommit"

akshu20791gmail@ip-172-31-83-7:~/Desktop/project$ git add .
akshu20791gmail@ip-172-31-83-7:~/Desktop/project$ git commit -m"newcommit"
[master 510e640] newcommit
2 files changed, 2 insertions(+)
create mode 100644 file1.txt
create mode 100644 letslearn.txt
akshu20791gmail@ip-172-31-83-7:~/Desktop/project$
```

Still I am not aware of the file which was updated on github.com

As normally, I will push the commit into the github

```
git push -u origin master
```

```

akshu20791gmail@ip-172-31-83-7:~/Desktop/project$ git push -u origin master
